A pedagogy plan is a yearly plan for teachers and schools for a complete year. The main aim of the pedagogical plan is to make the teaching and learning process more constructive, collaborative, integrative, reflective and inquiry-based. The school has a protocol that is followed, we have a “vision” and a “motto” too, but the pedagogical solution makes it easy to achieve by giving a path. Most of the part of pedagogy remains the same for a long time. But due to pedagogy, we find the revised depth to look at the curriculum, where we could focus to make the learner achieving the learning goal by doing. It gives a broader spectrum to the teacher, who is more a mentor, to use real-world examples to explain the situation. It gives a collaborative view to all the subjects by integrating activities in different subjects. It promotes aesthetic sensibility and experiential learning and at the same time, teachers are very much prepared with different resources. The plan makes it easy to make a student holistically developed.

**Our pedagogical plan tries to cover all the attributes:**

**Care Of diversity:**

The school always promotes diversity not only by encouraging students of different backgrounds to attend the school, but also make education impactful. Every student has a different ability and has a different way of learning, in-class we do promote resources of learning, also take proper care that each student should get the objective of the chapter and could apply it practically wherever required. The best way to promote each student equally is to identify the diversity in class and broaden the way of teaching accordingly .The care of diversity is included in the lesson plan.
